

Generating Formats

for all languages:

```
context --make --all
```

only english interface:

```
context --make en
```

for plain tex:

```
mtxrun --script plain --make
```

Updating

when installed from the wiki:

```
.... /first-setup(.cmd)
```

when downloaded from the website:

```
cd .... /tex/texmf-context
```

```
wget http://www.pragma-ade.com/context/current/cont-tmf.zip
```

```
unzip cont-tmf.zip
```

```
mtxrun --generate
```

Generating Command Lists

quick reference document of english and dutch commands:

```
context --interface=nl --global --result=setup-nl x-set-12.mkiv
```

```
context --interface=en --global --result=setup-en x-set-12.mkiv
```

Module Documentation

pretty printed, annotated module documentation:

```
mtxrun --script modules syst-aux.mkiv
```

Listings

verbatim listings of (ascii) files:

```
context --extra=listing --bodyfont=8pt --scite somefile.tex
```

```
context --extra=listing --bodyfont=8pt --scite somefile.lua
```

```
context --extra=listing --bodyfont=8pt --scite somefile.xml
```
